

## Gregg Goolsby Bio

Gregg has had a long career in business as a corporate automotive executive, working primarily for Mercedes-Benz, USA. He is also a lifelong educator- teaching marketing as an adjunct professor to MBA Students for many years at Fordham University and Seattle University. He now works as owner and director of Goolsby Industrial Properties, a commercial real estate investment company. Additionally, he is managing partner at his online photography business- *OSP Images*. “OSP is my little passion project. In partnership with my daughter Meghan, we seek to capture and share beautiful images with others to help them appreciate the natural beauty on our planet. Along the way, hopefully we will inspire them to help protect the natural world. We donate all proceeds from the sale of our fine art photos and education workshops to conservation and wildlife charities.” In the sports world he serves on the Board of Trustees as Treasurer of the USA Triathlon Foundation.

Gregg got started in photography back in 1978 when he combined his love of the outdoors with photography. As a college student, he purchased his first “real” camera- a Pentax K1000 35mm film camera, and learned to capture images of mountains and wildlife, while spending his summers working in Glacier National Park, Montana. “Glacier Park provided a spectacular backdrop and allowed me to refine my skills using a fully manual camera. I continued to enjoy photography as a hobby during my years working in corporate positions that provided opportunities to live in a number of locations and travel the world.” After completing his 35-year corporate career, he shifted gears and went back to school! He graduated in 2020 from the New York Institute of Photography, where he further honed his technical skills to compliment his years of experience as a hobbyist.

Gregg lives part-time in Manzanita with his wife Brenda. He displayed his work at the “Snap into Spring” Photo Show at the Hoffman Center in May and began teaching recently at the Hoffman recently starting with “Introduction to Photography”.
